

**SUBURBAN  
RAIL LOOP**

# Works Notification

## Site Investigations

Ivanhoe Street Reserve, Glen Waverley

**March 2020**

The Suburban Rail Loop Authority will be undertaking geotechnical investigations in Glen Waverley to assist with the early planning and design work for Suburban Rail Loop.

Suburban Rail Loop is a new rail link that will connect Melbourne's middle suburbs to major health, education and employment centres outside the central business district.

This is a city-shaping project that will revolutionise Victoria's public transport system and deliver significant urban renewal outcomes for Melbourne, transforming communities and precincts along the new rail corridor.

### What we are doing

Geotechnical investigations will be undertaken in Ivanhoe Street Reserve, Glen Waverley near the Scotchmans Creek Trail. See the map overleaf for the indicative location of these works. Works will begin early/mid-March 2020.

Our geotechnical program involves drilling in indicative investigation areas near the proposed alignment for the south east section of the Suburban Rail Loop. It is important we do these investigations to gain initial data and information about local ground conditions.

These works include:

- Non-destructive digging (NDD), which involves using a vacuum truck to excavate carefully into the ground to confirm an area is free of services
- Geotechnical drilling and testing to determine existing ground conditions. This involves drilling a borehole

- Installing a groundwater monitoring well inside the borehole to allow sample collection and measurement of groundwater levels.

### What to be aware of

- Geotechnical investigations will take place in Ivanhoe Street Reserve near Scotchmans Creek Trail which connects with Monash Aquatic and Recreation Centre.
- Pedestrian access around the works site will be maintained at all times
- Vehicle access along Ivanhoe Street will be maintained at all times
- Investigations will require temporary occupation of up to two on street parking spaces on Ivanhoe Street for support vehicles
- Where appropriate, traffic controllers and pedestrian signage may be in place to assist with access and wayfinding
- A site compound will be set up around drilling equipment to enable works to be carried out safely
- There will be periods of medium level noise associated with NDD and drilling works
- The area will be reinstated at the completion of works.

**SUBURBAN  
RAIL LOOP**  
AUTHORITY

## When

### Hours of work:

7am - 5pm, Monday to Friday.

7am - 1pm, Saturdays.

Works are expected to take approximately two weeks.

The timing of these works may change depending on weather and ground conditions.
